

OUTSHINE

Modern Stone's Outshine is a non-acid based polishing powder designed to bring back the deep reflective shine to marble surfaces. Outshine can also be used to remove light etch marks while providing a high quality shine without the use of diamond abrasives.

USES

For the restoration of most types of marble. Results will vary based upon the density of the stone and level of polish desired. Always test in a small inconspicuous area to determine ease of application and desired results.

COVERAGE

Approximately 600 to 1,000 sq. ft. per pound.

APPLICATION

Surface must be clean and free of dust, dirt, grease, oil, wax, or coatings of any kind. Pre-clean with Modern Stone's Stone Prep as needed for heavily soiled areas.

1. Mask off baseboards, appliances and other surfaces to protect from splash of slurry mixture.
2. Apply polishing powder (1/2 cup) plus water (1 cup) to create slurry.
3. Begin restoration using a weighted (130-140 pounds) 175 rpm floor machine or angled grinder/sander fitted with hogs hair or similar pad.
4. Add water and honing grit as needed to keep a sufficient level of slurry under the pad.
5. Hone floor until desired level of evenness is achieved. Extract slurry thoroughly after completion of each grit level with either a wet/dry vacuum or extraction machine with water.
6. Change pads with each change in powder grit level.
7. Rinse surface thoroughly after honing process is complete to remove slurry residue and excess compound.

Handling & Storage:

Close container after each use. Store in original container only. Keep in a dry well-ventilated area.

Caution:

Avoid prolonged dust inhalation. Use with adequate ventilation.
