

REVEAL & SEAL

WATER

Modern Stone's Reveal & Seal is a premium water based, enhancing sealer formulated to darken, highlight and enhance the beauty and character of natural stone. Reveal & Seal's U.V. resistant formula provides maximum stain protection from oil and water based stains. It allows for moisture vapor transmission and can be used for indoor and outdoor applications.

USES

- » Marble
- » Granite
- » Limestone
- » Travertine
- » Slate
- » Quartzite
- » Sandstone

COVERAGE

Approximately 200 to 1,500 sq. ft. per gallon.

VOC

VOC: 07 g/l

APPLICATION

1. Ensure surface is clean, dry and free of waxes or coatings.
2. Agitate bottle before use.
3. Apply enhancer sparingly* using a paint pad, roller, brush, lambs wool applicator or low-pressure chemical sprayer. Distribute product evenly over entire surface to ensure uniform coverage and maximum penetration.

*Note: Reveal & Seal provides maximum enhancement. A lighter initial application is recommended in order to determine substrate's porosity. Over applying enhancer may cause excess product to dwell on surface and make clean up more difficult. Do not allow excess sealer to dry on surface.

4. Allow sealer to dwell for up to 20 minutes, or until it begins to dry on surface. Remove excess with cotton bonnet pad or clean towels, until surface is completely dry.
5. For more porous substrates if darker appearance is required, apply a second coat 30 minutes after initial application.
6. Ready for foot traffic within 4 hours. Fully cures in 24-48 hours.
7. Clean tools with water.

Handling & Storage:

Close container after each use. Store in tightly closed container in well ventilated area. Avoid freezing or long-term high temperature storage. Avoid contact with strong oxidizing agents and acids. DO NOT THIN OR DILUTE.

Caution:

Rubber gloves and eye protection should be worn during application. Avoid contact with eyes and skin. Immediately flush eyes with water. If skin contact occurs wash with soap and water. Do not take internally. If ingested, do not induce vomiting. Seek medical attention. If inhaled, immediately move to fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention.
