

DARK & LIGHT

GRANITE GLOW

Modern Stone's Granite Glow polishing powders are specifically designed to bring back a high shine to granite surfaces. Formulated in dark & light for dark or light granites.

USES

For the restoration of most types of granite, for light granites use Granite Glow Light, for medium to dark granites use Granite Glow Dark. Results will vary based upon the density of the stone or level of polish desired. Always test in a small inconspicuous area to determine ease of application and desired results.

COVERAGE

Approximately 600 to 1,000 sq. ft. per pound.

APPLICATION

Surface must be clean and free of dust, dirt, grease, oil, wax, or coatings of any kind. Pre-clean with Modern Stone's Stone Prep as needed for heavily soiled areas.

1. Protect surfaces not intended to be treated from polishing compound.
2. Apply polishing powder (1/2 cup) plus water (1 cup) to create slurry.
3. Begin restoration using a weighted (130-140 lbs) 175 rpm floor machine or angled grinder/sander fitted with hogs hair or similar pad.
4. Ensure the slurry remains wet while refinishing by adding water and polishing powder as needed.
5. Polish floor until desired level of shine is achieved.
6. Extract slurry with wet/dry vacuum or other extraction equipment.
7. Rinse surface thoroughly to remove all slurry residue and excess compound.

Handling & Storage:

Close container after each use. Store in original container only. Keep in a dry well-ventilated area.

Caution:

Avoid prolonged dust inhalation. Use with adequate ventilation.
