

RELEASE

Modern Stone's Release is a fast drying, water based sealer used to pre-treat natural stone and masonry prior to grouting. Release eases grout clean up and reduces the potential for grout staining during installation. Release can be used on indoor and outdoor installations. Release can be used on marble, granite, slate, limestone, travertine, quartzite, and sandstone, unglazed tile, pavers, brick and masonry.

USES

- » Marble
- » Granite
- » Limestone
- » Travertine
- » Pavers
- » Unglazed Tile
- » Sandstone
- » Slate
- » Brick/Masonry

COVERAGE

Approximately 200 to 1,000 sq. ft. per gallon.

VOC

VOC: 94 g/l

APPLICATION

1. Sweep or vacuum surface to remove loose debris.
2. Apply Release liberally using a paint pad, roller, brush, lambs wool applicator or low-pressure chemical sprayer. Distribute product evenly over entire surface to ensure uniform coverage.

*Note: Do not allow excess sealer to dry on surface.
3. Allow sealer to dwell for up to 20 minutes, or until it begins to dry on surface. Remove excess with cotton bonnet pad or clean towels.
4. Allow for a minimum of 2 hours cure time before grouting.
5. During the grouting process, do not allow excess grout to completely dry on surface prior to removal.
6. Clean tools with water.

Handling & Storage:

Close container after each use. Store in original container only. Product is freeze-thaw stable. DO NOT THIN OR DILUTE.

Caution:

Avoid contact with eyes. Immediately flush eyes with water for 15 minutes. Avoid prolonged contact with skin. If skin contact occurs, wash with soap and water. If ingested, do not induce vomiting. Call poison control center. Seek medical attention immediately.
